

# Available Now

## 500kW server ready + 2MW dedicated data center space

### Facility

- 134,000 SF of data center space (multi-level)
- Highly reliable concurrently maintainable design
- Flexible infrastructure allows customers to customize their IT environment
- Hi-fog fire suppression and VESDA System
- Fault tolerant room separation

### Power

- 38MW total power
- 20MW critical power
- Utility power provided via 12 diverse feeds originating at 4 separate substations
- High reliability and efficient design

### Connectivity

- Network neutral access to all major carriers
- 2 diverse MMRs - 5 diverse POEs
- Metro-level and long-haul carriers that provide low latency connectivity

### Certifications

(SOC2 / Type 1+2)

### Operations

- Detailed remote system monitoring available
- Fully staffed 24/7 with highly skilled and trained data center operations team
- InCommand™ customer portal offers real time access to data center analytics
- Highly flexible smart hands available

### Security

- Dedicated 24/7 security staff
- CCTV in all critical locations and monitored in NOC
- Mantrap with anti-tailgating for all entrances
- Dual-level authentication at all mission critical entrances

### Choose 840 Canal

- Speed to market
- Centrally located - blocks from CBD/financial district
- Superior compliance program
- Ample and reliable power
- Efficient design
- Expansion options
- Low latency
